

BHAWANIPUR GLOBAL CAMPUS

(An Autonomous Institution)

BACKUP ELECTRIC SUPPLY

Bhawanipur Global Campus (An Autonomous Institution) ensures uninterrupted functioning of academic and administrative activities through a reliable **backup electric supply system**. The campus is equipped with high-capacity **Diesel Generator (DG) set of 250 KVA** that provide immediate power during grid failures, ensuring continuous operation of classrooms, laboratories, offices, elevators and essential services. Critical areas such as computer labs, examination control rooms, server rooms, and ICT-enabled classrooms are supported by **UPS** for seamless power during short outages and to protect sensitive equipment. Emergency lights, CCTV systems, and communication units remain operational through dedicated backup circuits. Regular maintenance, servicing, and safety checks of all backup equipment ensure dependable performance throughout the year.

Dr. Soumendra Nath Bandyopadhyay
Principal

A Unit of The Bhawanipur Gujarati Education Society
