

BHAWANIPUR GLOBAL CAMPUS

(An Autonomous Institution)

FABRICATION FACILITY LABORATORY (FABLAB)/TINKERING/INNOVATION LABORATORY

The college has established a Fabrication Facility Laboratory (FABLAB), also known as a Tinkering or Innovation Laboratory, to foster creativity, hands-on learning, and problem-solving skills among students. Equipped with modern tools, 3D printers, robotics kits, and other prototyping equipment, the lab provides a platform for students to design, fabricate, and test innovative ideas.

Students are encouraged to work on interdisciplinary projects, develop prototypes, and experiment with new technologies under faculty guidance. The lab also organizes workshops, competitions, and mentorship sessions to enhance technical skills and promote an entrepreneurial mindset. Overall, the FABLAB nurtures innovation, practical learning, and the translation of ideas into real-world solutions.
