

BHAWANIPUR GLOBAL CAMPUS

(An Autonomous Institution)

ERP SOFTWARE

Bhawanipur Global Campus (An Autonomous Institution) uses ERP (Enterprise Resource Planning) like Digiicampus, GreytHR, etc. software to streamline and integrate its academic and administrative processes. The system enables efficient management of student admissions, attendance, examinations, fees, and academic records through a centralized digital platform. Faculty and staff benefit from automated workflows, real-time data access, and reduced paperwork.

Students can conveniently access timetables, grades, notices, and other essential services online, improving transparency and communication. By adopting ERP software, the college enhances operational efficiency, ensures data accuracy, and supports a smooth and technology-driven administrative experience.

Digiicampus: Digiicampus is an integrated academic management software that streamlines institutional operations. It supports attendance tracking, timetable management, examinations, learning resources, communication, and administrative workflows. With real-time data access and user-friendly dashboards, it enhances efficiency for students, faculty, and administrators while ensuring smooth, transparent, and technology-driven campus management.

GreytHR: GreytHR is comprehensive HR and payroll software designed to simplify workforce management. It automates payroll, attendance, leave, compliance, and statutory reporting while providing employee self-service and analytics. With intuitive interfaces and secure cloud access, GreytHR boosts HR efficiency, reduces errors, and enhances organizational productivity for businesses of all sizes.
