EFFORTS TO ENCOURAGE STUDENTS TO PARTICIPATE IN NATIONAL/INTERNATIONAL COMPETITIONS AND TAKE UP INTERNSHIPS AND PROJECT WORK

Bhwanipur Global Campus (An Autonomous Institution) actively motivates students to participate in National and International competitions such as Smart India Hackathon (SIH), Ideathon, and other innovation-driven events. To support this, the institution conducts orientation programs, idea-generation workshops, and mentoring sessions where faculty and experts guide students in developing competitive project ideas. Dedicated innovation and entrepreneurship cells further assist teams in refining proposals, building prototypes, and preparing for competitive rounds.

Students are also encouraged to pursue internships and project work linked to these competitions, enabling them to gain hands-on experience, exposure to real-world problem-solving, and opportunities for collaboration with industry and government bodies. These initiatives help cultivate creativity, teamwork, and technical skills, while boosting students' confidence and enhancing their career prospects. Overall, the college fosters a culture of innovation and active participation in national and global platforms.
